PRE ENGINEERED BUILDING SYSTEMS

*Trust
Competence
Reliability*

Pre Engineered Building Solution with Knowledge, Expertise and Relationship.

PRE ENGINEERED BUILDING SYSTEMS

PEB System is since long a standard in commercial and industrial market segments such as warehouses, distribution centers and industrial facilities are continuing to make greater inroads into the low-rise sophisticated building market. Institutional and governmental constructions are some of the areas where PEB systems are being used more and more.

These buildings are increasingly recognized as reliable, aesthetically pleasing, energy efficient and cost-effective alternative to conventional buildings.

The sustainable green attributes of metal building systems with their recycled content and recycle-ability makes them a natural choice for today's building owners and consultants.

SONEX PEB

At Sonex PEB our goal is to provide clients with convenient, cost effective, high quality, turnkey pre-engineered steel building solutions. All of our buildings are completely customizable, and can be made to suit any standard, size or custom applications.

All our products and systems are produced with state-of-the-art ISO accredited manufacturing plants.

Our ultra modern facilities make it possible for us to be quick and accurate Pre Engineered Building manufacturer and deliver finished projects with exceptional speed.

By selecting MG Sonex PEB for your project, you are selecting a team who will assist your project planning activities from design through construction; and, last but not least, you get peace of mind.

PEB BENEFITS

Flexible design providing maximum utilization of interior space.

Withstands severe climatic conditions, weather resistant, earthquake resistant.

Large clear spans, easy renovation, expansion or modification. Can be dismantled and relocated.

Fabrication process reduces assembly labour, and subsequently lower erection cost.

Roof and wall systems are energy efficient. The system is 100% environment friendly as all the materials used can be recycled.

Flexibility to meet any need and economical. Saving on Material cost.

Eliminates costly field work to saves installation time.

WHY TO CHOOSE MG SONEX PEB

Reliable after sale service

Comprehensive and detailed engineering output

Attention to detail

Over 10 years of experience

Low maintenance

Faster Installation

Value-engineered solutions

Continuous product improvement

Stringent quality systems

Prompt Customer service

Quality products designed using international standard
